ASL
ASSOCIATION FOR SYMBOLIC LOGIC

ASL NEWSLETTER   January 2009

- **The 2008 Sacks Prize Awarded jointly to I. Epstein and D. Raghavan.** The ASL Committee on Prizes and Awards has selected Inessa Epstein of the California Institute of Technology and Dilip Raghavan of the University of Toronto as the recipients of the 2008 Sacks Prize. The prize consists of a cash award plus five years free membership in the ASL for each awardee.

  Epstein received her Ph.D. in 2008 from the University of California, Los Angeles, under the supervision of Greg Hjorth. The Prizes and Awards Committee citation notes that in her thesis, *Some results on orbit inequivalent actions of non-amenable groups*, she "solves one of the most important problems in measurable group theory, the resolution of which involves a combination of deep results from different branches of mathematics."

  Raghavan received his Ph.D. in 2008 from the University of Wisconsin at Madison under the supervision of Ken Kunen. The Committee cited that his thesis, *Madness and set theory*, "uses modern methods associated with independence proofs to obtain, just using ZFC, results on almost disjoint (MAD) families, that in particular solve a twenty-year old problem of Van Douwen."

- **The 2008 ASL Election.** The ASL membership has elected Lev Beklemishev (Steklov) and Roman Kossak (CUNY) to the Executive Committee, and Ayse Berkman (Ankara) and R. Ramanujam (CIT, Institute of Math Sciences, Chennai) to the Council. Their terms of office are for three years beginning January 1, 2009. The Nominating Committee consisted of Michael Hallett, Steffen Lempp, Rohit Parikh, John Steel (Chair), Stan Wainer, and Carol Wood.

- **ASL Newsletter via Email.** The ASL Newsletter is now being sent by email to all members for whom the ASL has an email address and who do not specifically request to be sent the printed version. To exercise this "opt-out" provision, please notify the ASL's subscription fulfillment agent at `asl-service@ams.org`.

- **New Member Benefit:** *The Review of Symbolic Logic.* Individual ASL members now receive the new ASL journal, *The Review of Symbolic Logic*, as an additional benefit of membership. Publication of the *RSL* by Cambridge University Press commenced in June 2008, and members should have received the first two issues.

  Joining *The Journal of Symbolic Logic* and *The Bulletin of Symbolic Logic* as the third official organ of the Association, the *RSL* publishes research papers in: philosophical and non-classical logics and their applications; history and philosophy of logic; and philosophy and methodology of mathematics. The first heading covers all areas of philosophical logic, plus applications of these logics in such fields as computer science, linguistics, game theory and decision theory, formal epistemology, cognitive science, and artificial intelligence. The second is intended to include the history of philosophy of logic, an area that overlaps substantially with what is often called 'history of analytic philosophy'. The third area includes both the philosophy of mathematics and methodological studies of mathematical practice, past and present.

  For more information about the *RSL*, including a complete listing of its Editors and Advisory Board, visit `http://www.aslonline.org/journals-review.html`.
